

Environmental Policy Statement

Panel Systems Limited manufactures and distributes insulated and decorative panels for use in a variety of applications to a wide range of markets, including Caravans, Leisure, Children's Play Equipment, Food, Staging, Office Equipment, Building and Construction.

Manufacturing is based at two sites in Sheffield - Parkwood and Waleswood where key manufacturing skills are:

- Ravatherm Fabrication
- Laminating Technology
- Pressing Technology
- Metal Fabrication including CNC punching & welding
- Cutting & CNC Manufacture

Preventing pollution and reducing the adverse environmental impacts that our organisation may have on the environment is important to us.

We are committed to continually improving our environmental performance and we will set annual targets. We are also committed to meeting or exceeding the requirements of ISO14001 through our policies and procedures.

To ensure we meet our commitments, we undertake to periodically monitor and review our environmental performance.

Everyone within Panel Systems has a responsibility for our environmental performance. We will seek to minimise waste, promote recycling and reduce energy consumption.

As Managing Director I am responsible for the effectiveness of the controls in place and I will ensure that this policy is implemented throughout Panel Systems.

Chris Ibbotson, Managing Director
